Water Rate

\$1.61/m³

Wastewater Rate

\$1.51/m³

Effective January 1st 2012

In 2012 the average homeowner should see an average increase of \$1.80 per month for each water and wastewater (sewer) service based on 20m³ usage per month.

How Your Bill is Calculated:

Customers are billed monthly. Your bill is calculated by adding your monthly fixed Service Charge to your usage charge. The usage charge is calculated by multiplying your monthly water consumption volume and water rate. When the amount of water used is zero or your monthly water bill is less than the minimum bill, then a minimum bill amount is charged to the customer in lieu of a Service Charge.

For wastewater, there is no fixed Service Charge; only a usage charge applies. From May 1st to September 30th, wastewater rates on single-family residential accounts are capped at 30 m³ per month to account for lawn watering. The cap does not apply for multi-residential dwellings or commercial, institutional or industrial customers. Based on a meter size of 15 mm (5/8") and 20 m³ usage, your monthly bill for water & wastewater is calculated as follows:

	Water	Wastewater
Fixed Service Charge for 15mm meter	\$8.52	N/A
*Usage Charge for 20m ³	\$32.20 (20m ³ x \$1.61/m ³)	\$30.20 (20m ³ x \$1.51/m ³)
Total Bill	\$40.72	\$30.20

Your Service Charge is a fixed cost that covers part of the cost of having the drinking water system available for use. These costs cover the operation and maintenance of our water distribution system, the preparation and processing of bills, and fire protection. Service Charges and Minimum Bill charges correspond to meter size as follows:

Water Meter Size	Service Charge	Minimum Bill
mm (inches)	For Water	For Water
15 (5/8")	\$8.52	\$8.52
20 (3/4")	\$8.62	\$10.00
25 (1")	\$8.93	\$12.50
40 (1.5")	\$9.44	\$40.39
50 (2")	\$10.46	\$68.85
75 (3")	\$19.64	\$138.21
100 (4")	\$22.70	\$311.10
150 (6")	\$30.86	\$511.02
200 (8")	\$38.00	\$868.53
